**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to retrieving name information stored in a database based on a query input, classified in class 707, subclass 3.
  - II. Claims 18-28, drawn to sorting and storing a name to a name list based on a score, classified in class 707, subclass 102.
  - III. Claims 29-31, drawn to a pattern matching of two proper names, classified in class 707, subclass 6.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as searching a database based on a query, while invention II has utility such as storing/building a name list with a name based on a score. Invention III has utility such as a pattern matching of two proper names. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2172

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
